SCHEDULE OF UNDERGRADUATE UNITS

Explanatory Introduction
Descriptions of all Bachelor Degree units of study offered in 2004 are given on the following pages. There is a description of each unit offered in 2004, as listed in the Schedule of Undergraduate Units. Some units are not offered in 2004, but that the University intends to offer in a later year, are also listed.

The Unit Descriptions include the following information:

Unit Code and Name
The codes are abbreviations for a discipline or subject area, plus a number. Refer to the list of identification codes preceding the Schedule of Undergraduate Programs.

Credit Points
The number of credit points attainable for the unit is shown.

Names of Staff Members
Wherever possible, the names of staff members in charge of particular units are included. However, the appearance of a particular staff member’s name in relation to any unit indicates that he or she is the person to whom enquiries about the unit should be addressed, and not necessarily an indication that he or she will teach that unit.

Class Contact Hours
Some Departments give the class contact hours for their undergraduate units in the unit description.

Unit Designation
Details of unit designations are given in the Schedule of Undergraduate Units.

Prerequisites
Details of prerequisites are given in the Schedule of Undergraduate Units.

Corequisites
Details of corequisites are given in the Schedule of Undergraduate Units.

NCCW (Not to Count for Credit With)
Details of NCCW are given in the Schedule of Undergraduate Units.

When Offered
Details of when units are offered are given in the Schedule of Undergraduate Units. If a unit has a composite mode (‘c’) offering, details of teaching arrangements are given in the description wherever possible. Students are advised to check details with staff in charge of the unit.

On-campus Sessions
Details of on-campus sessions (for external units) are given in the Schedule of Undergraduate Units.

Compulsory Requirements
If a unit includes compulsory excursions or field trips, details are given in the description. Some Departments give details also of practical/laboratory requirements.

Selection of Units of Study
Although undergraduate students are required to register in a Division that reflects their major interest, they have the opportunity to broaden their intellectual horizons by including, in their degree programs, units of study in disciplines significantly removed in content and methodology from those offered in their Division of registration. Students are encouraged to take advantage of this opportunity.

Many such units are on offer. They do not carry specialised prerequisites and may be taken by students who do not wish to initiate a formal program of study in the discipline concerned, but only to enrich their educational experiences.

Students are advised to consult the Schedule of Undergraduate Units and the accompanying unit descriptions.
Handbook of Undergraduate Studies – 2004

Online Undergraduate Units

A large number of units are available online, either wholly or in part. Most are listed on the Macquarie University Online Teaching Facility at http://online.mq.edu.au/. Others can be found on Department web sites. For more information about a particular unit, contact the unit convenor.

These units might have a variety of online components, such as unit outlines, course materials, lecture recordings, learning activities, simulations, quizzes, email and group discussions facilities. Depending on the nature of the unit, the online components might be either compulsory or optional extras.

Most units also provide electronic access to Library materials at http://www.lib.mq.edu.au/resources/reserve.html.
Guide to Undergraduate Units

Units within the Schedule of Undergraduate Units and the Unit Descriptions have been ordered alphabetically according to the Department or Division that is offering the unit. The list below provides a guide to the order in which they appear.
